- **Assign Equipment**

## Cosmos Forms

Cosmos Forms is a mobile forms and process automation company. Our modern, mobile forms technology integrates with Cosmos Operations and Cosmos Insights solutions and with other existing business systems. The flexibility of our solutions address a wide variety of business challenges across safety, quality, field and plant operations. We replace paper forms, spreadsheets, manual processes and legacy systems with easy to build and use mobile solutions to modernize and automate work.

## Realize Operational Efficiencies

**Data is gathered real time, one time and shared in the field** with managers to automate operations.

**Get the right data at the right step in the process** with intelligent, dynamic forms that are tailored to fit your business needs and processes.

**Digitize the process end-to-end** with forms triggered from business systems, or created in the field and integrated with email and your systems of record.

**Get insights** into your field team's activities to monitor safety, quality, completion and compliance.

## Increase Field Safety

Easy to use forms **take less time, provide more accurate data** and **instantly assign corrective actions** to ensure hazards are identified and quickly corrected.

Track and manage **worker competency, training and certification**. Alert workers and managers to recertification and training requirements.

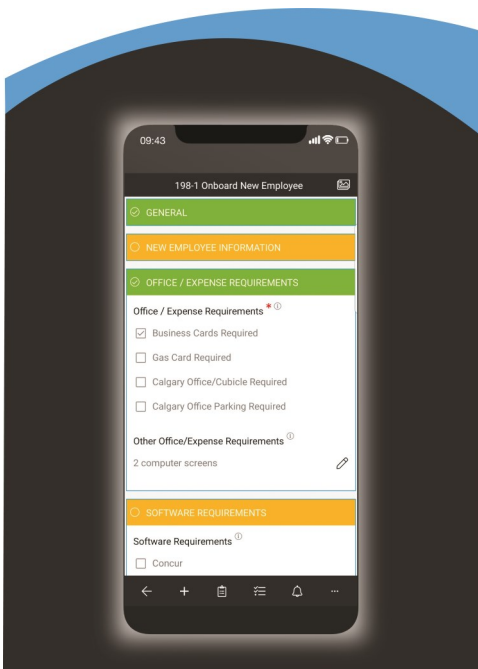

**Analyze historical data** to identify risk areas and associated training or process changes required to **reduce risk**.

## Improve Quality

Analyze data gathered in real time to be able to **highlight** product or process **inconsistencies**.

**Easily follow-up on audit recommendation and actions** captured during the audit process. Standardized input and adaptive questions **reduce time to complete audits and inspections**.

- **Mobile first**
- **Intelligent processes**
- **Any workload, anywhere**
- **Smart synchronization**
- **Industry solutions**

- **Inspections**
- **Safety Meetings**
- **Hazard IDs**
- **Non-Conformance**
- **Employee Onboarding**
- **Incident Reports**
- **Order PPE**
- **Assign Equipment**

## Cosmos Forms

**Replace Paper and Spreadsheets** with a cost effective intelligent dynamic forms and workflow solution.

- Capture data where it originates.
- Automate processes with intelligent forms AND actions.
- Mobile to mobile capability .
- Integrate to existing business processes and solutions.
- Smart sync & online/offline.
- Intelligent version management.
- Easy to design intelligent forms - no code/drag & drop.
- Dynamic forms based on user input.

## Cosmos Operations

**Do More.** Extend Cosmos Forms and Cosmos Insights with our integrated suite of solutions that you can tailor to precisely fit your business processes.

**Quality, Health & Safety and Environment**— Track leading and lagging indicators, inspections and other types of forms with the ability to integrate with facilities, assets/equipment, PPE inventories, mileage/usage tracking, worker participation target management, equipment inspection rule and schedule definitions, and more .

- Schedule and plan recurring standard jobs and work orders and prioritize unscheduled work.
- Define service pricing by customer, or by project.
- Automate field tickets, work orders, customer communications and integrate with accounting to speed time to invoice
- Dispatch work orders to assigned workers, capture work order details online or offline, and track the labor, parts and equipment used.

**Worker Processes and Competency, Asset Management/Maintenance Operations and Repairs and much more.**

## Cosmos Insights

**Gain Insight.** Powerful interactive reporting and data visualizations – taking you from data to insights to decisions.

- Combines data from Cosmos Forms, Cosmos Operations and other business systems and Cosmos Insights allowing you to review and analyze your operations information to make critical optimization decisions.
- Drill down to underlying data for further analysis
- Visually review historical data to see progress and trends over time
- Completely customizable.
